

Billing Quick Reference

This reference table provides commonly used CPT codes with guidance on when to apply them and sample documentation language for integrating magic tricks into therapy sessions:

CPT Code	When to Use / Sample Documentation
97530 – Therapeutic Activities	Sequencing, motor planning, bilateral coordination, functional tasks. Sample: “Client performed Instant Knot to improve sequencing and problem-solving for ADLs.”
97110 – Therapeutic Exercise	Strength, endurance, ROM, dexterity through repeated trick practice. Sample: “Client repeated Jumping Rubber Band to strengthen finger flexors for handwriting.”
97112 – Neuromuscular Re-education	Coordination, postural control, midline crossing, proprioception. Sample: “Client engaged in Floating Pencil to address midline orientation and motor control.”
97535 – Self-Care/Home Management	Application of trick to ADLs/IADLs. Sample: “Client practiced Linking Paper Clips to support dexterity for managing fasteners.”
92507 – Speech/Language Therapy	Expressive communication, sequencing, pragmatic language. Sample: “Client described Vanishing Cotton Swab steps to enhance expressive language.”

Use CPT codes in alignment with payer guidelines, scope of practice, and clinical justification. This reference supports the integration of Magic Therapy® into evidence-based, reimbursable practice.
